

# DynaWash

Garment and Printed Fabric Durability Tester with TestWise Touch™

## Overview

Garment and Printed Fabric Durability Tester with TestWise Touch™. Ideal for laboratories performing a high volume of wash tests, offering time-saving and sustainability benefits.

# Features

## A lifetime of laundering

Fifteen minutes of testing in the DynaWash is approximately equivalent to five domestic washes, removing the need for repeated wash and dry tests.

## The sustainable option

DynaWash offers significant savings in water, energy and CO<sub>2</sub> emissions in comparison to traditional washing methods. It also allows retailers to demonstrate the durability of a garment.

## Multiple test types

A range of textile testing can be performed in the DynaWash, including print durability, pleat retention, cockling, flock retention, crinkling, differential shrinkage and security of attachments, plus many others.

## TestWise Touch

TestWise Touch, intuitive touch-screen operating system - customise tests and begin testing in just 3 clicks.

## Material / End use
